PMI Agile Certified Practitioner (PMI-ACP)®

Get certified as an agile project management professional

Training goals

The PMI® Agile Certified Practitioner (PMI-ACP®) is the official proof of your knowledge of the application of the various popular agile approaches, methods and principles. Take your first step into agile project management and learn how to use agile techniques.

The PMI-ACP® certification was developed by agilists for agilists.The PMI-ACP® training covers many agile approaches such as Scrum, Kanban, Lean, Extreme Programming (XP) and Test Driven Development (TDD). You will develop a basic understanding of agile and learn to distinguish between the different approaches. They learn to select the agile methods that will make their projects successful.

Target group

- For experienced project experts, such as Project Management Professionals (PMP®), the PMI-ACP® training is the optimal introduction to agile project management methods.

Exam information

- The certification exam consists of 120 multiple choice questions for which you have three hours.

Requirements

- Further qualification (degree, technician, specialist training)
- 21 contact hours of training in agile practices, which you prove with this training programme.
- 12 months general project experience within the last 5 years.
- 8 months agile project experience within the last 3 years

Contents

- PMI-ACP® certification certifies expertise in the application of agile practices

- A PMI-ACP knows other frameworks, approaches and ideas besides Scrum, as well as their strengths and weaknesses and various possible combinations from agile project management.
- A PMI-ACP is familiar with agile principles such as self-organisation and interdisciplinarity
- A PMI-ACP can react correctly to the described problems by applying appropriate good practices.
