ALVISSION

ALVISSION Trainings

We train you –
practice-oriented and sustainable

CATALOG 2024

Accelerate with Education

Our training offer
for your company's success

We started 2018 as a training provider with a focus on project management and agile transformation under the motto "Continue with education". For 2023, we have also further developed our training portfolio to meet your needs. We look forward to offering you proven and new, innovative, and challenging training formats.

In addition to international awards for our digital training formats, ALVISSION 2020 was the first authorized training partner of the **Project Management Institute (PMI®)** with the entire hybrid training portfolio of the PMI in Europe.

When choosing your next training course, combine the innovative strength of our company with the proven quality of a premium provider.

Premier Authorized Training Partner PMI-ATP
The PMI Authorized Training Partner Program is designed to help you find high quality training from PMI accredited training providers.

Disciplined Agile Consulting Partner
ALVISSION EDUCATION became in 2022 the first PMI DA Consulting Partner in Europe. Only few Premier ATPs worldwide have this authorization.

Training with an Authorized Partner guarantees the following:
- You will be trained by an organization you can trust.
- Proven compliance with PMI requirements for training partners, the world's largest project management association.
- The trainers need to be up to date with the latest learning methods and continuously improve their skills.
- Courses must be up-to-date and aligned with the latest PMI Global Standards.
- Continuous quality improvement processes and procedures are demonstrated throughout the organization.
- This status ensures that we meet the quality standards of the Project Management Institute (PMI®).
- Our training hours can be credited as PDU (Professional Development Unit), so-called learning hours for your certifications and re- certifications.
- Only with a PMI-ATP you will receive the official Disciplined Agile and Project Management trainings.

Our Trainings

We make you fit for project management, leadership and communication

Our Training Topics
Line of Business Project Management

ID	Training topic
T-PM1	Hybrid Project Management Foundation – Your start in project management
T-PM2	Hybrid Project Management Advanced – Your next step to becoming a project management professional
T-PMP-Zert	Project Management Professional Certification (PMP)® – Get certified as a project management professional
T-CAPM-Zert	Certified Associate in Project Management (CAPM)® – The entry-level certification for young professionals
T-DASM	Disciplined Agile® Scrum Master Certification (DASM) – Solutions for agile team members
T-DASSM	Disciplined Agile® Senior Scrum Master Certification (DASSM) – Solutions for agile team leaders
T-DAC	Disciplined Agile® Coach Certification (DAC) – Solutions for agile consultants and agile coaches
T-DAVSC	Disciplined Agile® Value Stream Consultant Certification (DAVSC) – Solutions for agile consultants and agile coaches
T-AG	Agile Basics & Mindset – Agile working in the modern world
T-PSMI	Professional Scrum Master Training (PSM I) – Start into the agile world as scrum master
T-PSPOI	Professional Scrum Product Owner Training (PSPO I) – Start into the agile world as scrum product owner
T-PMSIM	Project Simulation Training – Project management with fun and games
T-PBA	PMI Professional in Business Analysis (PMI-PBA®) – Get certified as a business analysis professional
T-ACP	PMI Agile Certified Practitioner (PMI-ACP®) – Get certified as an agile project management professional

T-ALJ	Agile Leadership Journey® (Advanced) – Agile leadership for experienced leaders
T-GPM-2	Green Project Management GPM-b Certification Training – For certified project managers - 2 days
T-GPM-3	Green Project Management GPM-b Certification Training – With project management basics - 3 days
T-SAFe I	Certified SAFe® Agilist – In combination with Disciplined Agile
T-LPL	Lateral Leadership – Your introduction to modern leadership for project manager and professionals
T-PBM1	Project Business Management Foundation – Fundamentals of customer project management
T-PBM2	Project Business Management Advanced – Managing customer projects in an international context

Hybrid Project Management Foundation

Your start in project management

Training objectives

In this training, participants learn the basic methods and tools of professional project work from proven classical, forward planning and popular agile approaches such as Scrum, Kanban, Lean and others.

- Classical, agile and hybrid methods are trained interactively and digitally in working groups.

- This practice-oriented basic training is based on the international project management standard ISO 21500 and thus forms the foundation and framework for successful projects.

- By combining practical applications from classic and agile methods, participants learn to select the methods that are best suited to their project approach.

- Through the direct implementation of the learned knowledge in the exercises, the participants develop a high level of skills and abilities that they can use profitably in their projects or for their line work immediately after the training.

- Participants receive a certificate with proof of 14 net learning hours for international certifications.

Target audience

- Project staff with little or no previous knowledge of project work

- Employees who want to learn basic methods and tools of hybrid project work to make their daily project work more effective and efficient.

Content

In the practical exercises, participants work on their project tasks digitally with easy-to-understand office tools, apps and templates. We work with proven didactic elements, excursions, collaboration exercises, real-time processing on digital platforms, discussion rounds and many interesting project management applications from classic and agile practice.

Our experienced and certified trainers enrich the training with exciting digressions, easy-to-understand and entertaining examples.

Practical exercises

- Basics of professional project work (ISO21500) and application of agile principles in classic projects

- Challenges and advantages of the classic phase- based, pre-planning approach

- Challenges and advantages of the agile, iterative incremental approach

- Challenges and advantages of the hybrid approach

- Stakeholder analysis, clarification of objectives and mandate

- Work package description, user stories, backlog structure

- Adaptive project planning, communication planning

- Risk analysis, as well as methods and instruments of hybrid project work

- Agile project management vs. hybrid project approach

- Lessons Learned and Retrospective

The participants can bring their projects or plans into the training in advance. This gives them the opportunity to work on their real project tasks in the working groups.

By working on own project topics in the training, coaching by the trainer takes place at the same time. The results can be incorporated into the daily work immediately afterwards.

Hybrid Project Management Advanced

Your next step to becoming a project management professional

Training objectives

In this training, participants learn the advanced methods and tools of professional project work from proven classical, forward planning and popular agile approaches such as Scrum, Kanban, Lean and others.

- Classical, agile and hybrid methods are trained interactively and digitally in working groups.
- Participants learn according to the Disciplined Agile motto "Choose Your Way of Working".
- This practice-oriented training for graduates of the basic training and advanced project staff deepens the application of classic and agile project methods and tools.
- By combining practical applications from classic and agile methods, participants learn to select the methods that are best suited to their project approach.
- Through the direct application of the acquired knowledge in the exercises, the participants develop a high level of skills and abilities that they can use profitably in their projects or for their line work immediately after the training.
- Participants receive a certificate with proof of 14 net learning hours for international certifications.

Target audience

Any employee with basic knowledge of project work who works in or with projects, as well as employees who want to learn advanced methods and tools of advanced hybrid project work to make their daily project work more effective and efficient.

Content

In the practical exercises, participants work on their project tasks digitally with easy-to-understand office tools, apps and templates. We work with proven didactic elements, excursions, collaboration exercises, real-time processing on digital platforms, discussion rounds and many interesting project management applications from classic and agile practice.

Our experienced and certified trainers enrich the training with exciting digressions, easy-to-understand and entertaining examples.

Practical exercises

- Advanced project work methods (ISO21500) and application of agile principles in classic projects
- Advanced methods of the classical phase- based, pre-planning approach
- Advanced methods and tools of the agile, iterative incremental approach
- Proven advanced methods and tools from classical and agile approaches combined to create a successful hybrid approach
- Deepening stakeholder management and communication management as success factors
- Value orientation in hybrid project management (value stream, earned value management...)
- How does Agile Leadership support Lateral Leadership?
- Project control and monitoring in the hybrid project
- Insight into Disciplined Agile the first hybrid process toolkit for projects and product cycles
- Lessons Learned and Retrospective

The participants can bring their projects or plans into the training in advance. This gives them the opportunity to work on their real project tasks in the working groups.

By working on one's own project topics in the training, coaching by the trainer takes place at the same time. The results can be incorporated into the daily work immediately afterwards.

Project Management Professional Certification (PMP)®

Get certified as a project management professional

Training objectives

The training aims to:

- Provide you with an efficient learning experience through a well-structured course where you understand the focus of the exam.
- To provide you with tips and tricks for the exam through our many years of PMP experience, so that you can recognize and avoid the pitfalls of the exam.
- To teach you content with practical examples, interactivity and variety, so that you not only pass the exam, but also gain many insights for your daily project work from the training.

Target audience

- Project participants who want to improve their project management skills.
- Project participants who want to increase their chances on the job market.
- Project participants who want to climb to the next level in their careers.
- Project participants who want to earn a higher income by upgrading their qualifications.

Note: A minimum of 3 years of project participation is required for certification.

Content

The content of the training is based on the current examination content outline of the PMI. This is basically divided into 3 domains:

1. People (42% of exam questions)
2. Processes (50% of exam questions)
3. Business environment (8% of exam questions)

As an Authorized Training Partner of the PMI (PMI-ATP), we work with high-quality training materials that have been specially developed by PMI.

The detailed contents of the individual domains can be read here: Link

Your benefits

- **Comprehensive learning materials**: Access to the official PMI learning platform with advanced videos, specially developed ALVISSION Study Guide, FAQs, and much more.
- **Exam Simulations**: Access to exam simulations with official PMI questions, which we receive exclusively as an Authorized Training Partner. These will help you to test your level of knowledge so that you can go into your exam date without any worries.
- **Flexible Learning Packages**: We know that PMP certification is a big investment in your professional future and have developed tailor-made learning packages for every budget class.
- **Post-training support:** We know from many years of experience that many questions only arise after the training. In our Study Groups, you will therefore have the opportunity to ask your questions to one of our PMP-certified trainers every 2 weeks.
- **Obtaining PDUs:** You will receive 35 Professional Development Units (PDUs) for this course, which you can use for the re-certification of further PMI certifications.

Methodology

Certification courses are often considered to be heavily theory-focused. However, we strive to go beyond mere knowledge transfer. By integrating numerous practical examples and actively engaging participants to share their experiences in the group, we create a highly hands-on and interactive learning environment that goes beyond just reading slides aloud.

In addition, each theoretical part is followed by a division into small groups to apply test questions to the specific theoretical part. In this way, we ensure that the theoretical content is immediately linked to the PMI mindset. Developing this mindset is the biggest step towards successfully passing the exam.

Certified Associate in Project Management (CAPM)®

The entry-level certification for young professionals

Training objectives

- Optimal preparation for entry-level certification CAPM® of the World Professional Association for Project Management (PMI®).

- With this training you will learn the international methods and techniques of the different disciplines of project management.

- Our certified trainers and coaches accompany you in your exam preparation.

Target audience

- Young professionals, students and anyone interested with less than 3 years of project experience with the aim of gaining one of the most prestigious international project management qualifications.

Prerequisites

- High school diploma or intermediate level of education

AND

- 23 contact hours in project management training, which you prove with this seminar.

Our Premium Study Concept

- Your path to the CAPM® begins with our live online training, in which sound examination knowledge and theoretical basics are intensively developed. Our training courses are characterized by an optimal combination of knowledge transfer and practical applications.

- You will be trained with high quality course content developed by RMC Learning Solutions.

- After the training, participants study together in moderated one-hour study groups every two weeks. There, participants can discuss questions and exchange ideas comprehensively on the exam questions. In addition, a PMI®-certified tutor answers the participants' questions and provides additional learning materials.

- We also offer an online exam simulator with more than 850 exam questions.

Content

Domain 1 Project Management Fundamentals and Core Concepts

- Project Management Basic Concepts, Processes and Responsibilities

Domain 2 Predictive, Plan-Based Methodologies

- Understanding when this approach is appropriate

- Methods and techniques for project planning

- Methods and techniques for monitoring and controlling

Domain 3 Agile Frameworks/Methodologies

- Understanding when this approach is appropriate

- Methods and techniques for project planning

- Methods and techniques for monitoring and controlling

Domain 4 Business Analysis Framework

- Understanding the role of the business analyst

- Methods and Techniques for Business Analysis

- Communication with stakeholders

- Requirements Management

Examination Content Outline, which has been valid since 24.05.2023.

Disciplined Agile® Scrum Master Certification (DASM)

Solutions for agile team members

Training objectives

- Begin your agile journey learning multiple agile approaches; understand how to use the Disciplined Agile tool kit and find your way of working (WoW).

- This comprehensive training introduces leading agile and lean approaches like Scrum, Kanban and more that frees you from any single agile framework and opens your options.

- While this course provides an opportunity to certify as a DA Scrum Master, the skills learned are valuable to any team member.

Target audience

Everyone that:

- heard of agile approaches and is curious on how to tailor it to benefit daily work the most.

- would like to get the Basics in Disciplined Agile and use it to improve the way of working and deliver results for the organization.

- experienced traditional approaches and would like to get more tools for the professional toolbox.

- want to be part of a high-performing agile team.

- would like to show the ambitions to aim higher with a DA Certificate from an Authorized Training Partner

Exam information

- **Your certification & exam fee (200$) is included in the course fee.**

- You have **60 days** after completing the training to take the exam **online**.

- Certification is granted after you pass the exam.

Your benefits

- Official Disciplined Agile Training, which you can only attend with an authorized PMI training partner (PMI-ATP) such as ALVISSION EDUCATION.

- Access to the official PMI learning platform with additional videos, specially developed ALVISSION Study Guide, FAQs, and much more.

- Training led by PMI-authorized instructors

- The Disciplined Agile Toolkit provides you with the knowledge you need to immediately apply what you have learnt in your professional practice immediately.

- Access to our Disciplined Agile test simulator with over 100 test questions.

- Become part of the Disciplined Agile Study Group. A Q&A session moderated by Q&A session moderated by experts who will answer your open questions about exam preparation after the training.

Content

- Understand the Disciplined Agile mindset and its underlying principles, such as pragmatism, the power of choice and adapting to context.

- Explore multiple leading agile and lean approaches like Scrum, Kanban and more.

- Learn about the fundamentals of agile and lean, and how to use both approaches effectively.

- Understand how to put these strategies into action on your agile team and ensure effective implementation.

- Learn how to apply the Disciplined Agile tool kit to discover the best way of working (WoW) for you and your agile team in your unique situation.

- Be prepared to take the Disciplined Agile Scrum Master (DASM) Certification exam.

Disciplined Agile Senior Scrum Master Certification (DASSM)

Solutions for agile team leaders

Training objectives

- This training will enable you to lead agile teams in a modern way and lead your projects to success.
- Adopt an agile mindset as well as being able to tailor and scale any agile or lean approach using the Disciplined Agile tool kit to choose your way of working (WoW).

Target audience

Everyone that:

- Has at least two years of experience working in an agile team
- is a scrum Master/Product Owner who would like to look behind prescriptive frameworks to improve the Teams Way of Working
- struggles with navigating complex project environments.
- experienced that traditional approaches are not fitting the current Way of Working
- suffers from slow time to market and the capability to show value to key stakeholders early.
- want to lead high-performing agile teams.
- would like to show the ambition to aim higher with a DA Certificate from an Authorized Training Partner

Exam information

- **Your certification & exam fee (200$) is included in the course fee.**
- You have **1 year** after completing the training to take the exam **online**.
- Certification is granted after you pass the exam.

Your benefits

- Official Disciplined Agile Training, which you can only attend with an authorized PMI training partner (PMI-ATP) such as ALVISSION EDUCATION.
- Access to the official PMI learning platform with additional videos, specially developed ALVISSION Study Guide, FAQs, and much more.
- Training led by PMI-authorized instructors
- The Disciplined Agile Toolkit provides you with the knowledge you need to immediately apply what you have learnt in your professional practice immediately.
- Access to our Disciplined Agile test simulator with over 100 test questions.
- Become part of the Disciplined Agile Study Group. A Q&A session moderated by Q&A session moderated by experts who will answer your open questions about exam preparation after the training.

Content

- Accelerate your ability to lead high-profile initiatives that are critical to enterprise success.
- Take a deep dive into the Disciplined Agile tool kit to develop a comprehensive understanding of the hundreds of practices and strategies it contains and the trade-offs of applying them.
- Apply the Disciplined Agile tool kit in hands-on exercises to guide your team in choosing and evolving your best way of working (WoW) in real-life situations.
- Use the tool kit to solve complex challenges commonly encountered in development and operational teams, the value stream, and at the enterprise level.
- Learn how to design and implement metrics that measure your improvements in areas where your teams are struggling.
- Understand how to nurture emotional intelligence.
- Feel confident empowering others on your team(s).
- Learn how to lead your teams in any situation to improve value delivery for your customers.
- Apply the Disciplined Agile tool kit to guide your team in choosing and evolving the best way of working (WoW) in the situation you face.
- Be prepared to take the Disciplined Agile Senior Scrum Master (DASSM) exam and earn valuable, credible certification.
- You will be introduced to the advanced content through a pre-study self-learning phase.

Disciplined Agile® Coach Certification (DAC)

Solutions for agile consultants and agile coaches

Training objectives

- Coach, Motivate and Inspire Teams with Disciplined Agile
- Take your Disciplined Agile® knowledge and experience to the next level. Help organizations achieve true agility by coaching teams across the enterprise on how to apply Disciplined Agile and choose their best way of working.

Target audience

Everyone that:

- Has three years of agile coaching experience
- would like to Master the Disciplined Agile tool kit and help teams find the best way of working for their unique situation.
- would like to understand how to align teams with organizational strategies and goals to enable agile transformation.
- would like to facilitate cultural change, business agility, and transformation.
- would like to accelerate process improvement across the whole organization.

- The Disciplined Agile Toolkit provides you with the knowledge you need to immediately apply what you have learnt in your professional practice immediately.
- Become part of the Disciplined Agile Study Group. A Q&A session moderated by Q&A session moderated by experts who will answer your open questions about exam preparation after the training.

Exam information

- **Your certification & exam fee (200$) is included in the course fee.**
- You have **1 year** after completing the training to take the exam **online**.
- Certification is granted after you pass the exam.

Content

Pre-workshop (Phase 1, asynchronous learning):

- The Disciplined Agile Coach
- Working toward the end goals of DA™ coaching
- Supporting change at the individual, team, and groups of teams
- Coaching teams within the context of their organization
- Coaching teams through their transformation journey

Workshop (Phase 2, in-class learning):

- The DA mindset
- Working with your existing governance/PMO team
- Identifying challenges and competencies
- Determining improvement opportunities
- Working with the improvement backlog
- Creating a coaching playbook
- Implementing guided continuous improvement (GCI)
- Visualizing and removing impediments
- Determining the root cause of issues
- Supporting diversity in the workplace
- Guiding teams through the change process
- Overcoming barriers to decision making
- Working with external teams – GCI across disparate teams
- Helping your organization develop needed capacity

Disciplined Agile® Value Stream Consultant Certification (DAVSC)

Solutions for agile consultants and agile coaches

Training objectives

- Do you want to accelerate value delivery at scale by moving beyond individual teams and applying Disciplined Agile across your organization?

- Disciplined Agile Value Stream Consultant (DAVSC) folds practices from Flow, Lean, the Theory of Constraints, and Organizational Development into Disciplined Agile to give you the tools to optimize enterprise-wide value streams.

- Filled with collaborative activities, supplemental reading and more, this 21 PDU instructor-led course goes beyond a single framework by teaching you the mindset, practices, and tools to reduce waste and focus on what matters.

Target audience

Everyone that:

- Has three years of experience working in an agile team.

- would like to be equipped to tailor an organization's improvement plan based on its unique needs. This plan includes where to start and the pace at which to work.

- would like to know how to accelerate value delivery at scale.

- would like to use the DA™ tool kit to apply a combination of Flow, Lean, Theory of Constraints and Organizational Development theories and practices.

- would like to be able to train an organization to continue to improve on its own.

Exam information

- **Your certification & exam fee (200$) is included in the course fee.**

- You have **1 year** after completing the training to take the exam **online**.

- Certification is granted after you pass the exam.

Your benefits

- Official Disciplined Agile Training, which you can only attend with an authorized PMI training partner (PMI-ATP) such as ALVISSION EDUCATION.

- Access to the official PMI learning platform with additional videos, specially developed ALVISSION Study Guide, FAQs, and much more.

- Training led by PMI-authorized instructors.

- The Disciplined Agile Toolkit provides you with the knowledge you need to immediately apply what you have learnt in your professional practice immediately.

- Become part of the Disciplined Agile Study Group. A Q&A session moderated by Q&A session moderated by experts who will answer your open questions about exam preparation after the training.

Content

Disciplined Agile Value Stream Consultant (DAVSC) folds practices from Flow, Lean, the Theory of Constraints, and Organizational Development into Disciplined Agile to give you the tools to optimize enterprise-wide value streams. Filled with collaborative activities, supplemental reading and more, this 21 PDU instructor-led course goes beyond a single framework by teaching you the mindset, practices, and tools to reduce waste and focus on what matters.

- Learn to determine the best place for an organization to start.

- Be equipped to tailor an organization's improvement plan based on their unique needs, while also paying attention to their culture.

- Know how to accelerate the realization of value by your customers at scale.

- Identify the most effective practices for each situation with the help of the DA™ tool kit—whether it be a new Agile transition or continuing a stagnated SAFe or Spotify approach.

- Be able to train an organization to continue to improve on their own.

Agile Basics & Mindset

Agile working in the modern world

Training objectives

- In this practice-oriented application training, participants learn the most important agile approaches for projects and their daily work. They develop a basic understanding of agile principles and can apply them in practice after the training.

- Participants learn the differences between agile and classic working methods. This will enable them to adapt your working methods to your working context in the best possible way.

Target audience

- People interested in agile ways of working.
- No previous knowledge is required.

Content

- Understanding of the agile principles
- Creating awareness of the basics and prerequisites of agile working methods
- Challenges of the modern working world
- Basics of the popular agile approaches
- Presentation and deepening of the most popular agile working methods and tools (Scrum, Kanban, Lean, Design-Thinking)
- Differences between classical and agile working and project methods
- Success factors for agile working

Practical exercises

Participants work in small groups on different, practical deployment scenarios:

- Scrum Simulation
- Kanban Game
- Planning Poker
- Visualize value stream
- Tips and tricks for daily work (Work Hacks)
- Principles of the agile manifesto

Participants discuss the challenges of agile transformation with the experienced trainer and thus develop an awareness of the impact of agile changes in their company.

Scrum Master Training (PSM I)

Start into the agile world as scrum master

Training objectives

- We prepare you for the exam with our certified trainers and coaches, based on the current Scrum Guide.

- Understand the basic principles of the agile project management methodology Scrum.

- Learn methods and approaches for your work as a Scrum Master.

- Learn - as part of the Scrum team - to further develop your organization.

- Help your teams to reap the benefits of Scrum.

Target audience

- This entry-level training is aimed at all those who want to use the advantages of Scrum for their professional activities. In the process, as a certified Scrum Master, you will be empowered to promote cultural agility and create a good environment for self-organised teams.

Exam information

- **The exam fee is included in the training price.**

- The one-hour exam to become a Professional Scrum Master can be taken online at any time.

- Certification is granted after passing the examination.

Content

- Internalize the mindset that Scrum is based on.

- Learn the importance of cultural agility and how to use it for your team success.

- Understand the important Scrum artefacts, roles, and events.

- Experience the cooperation of the different roles within the Scrum process model in an interactive Scrum simulation.

- Learn how Scrum can be permanently anchored in agile teams and how its application can be ensured.

- An examination simulation under real conditions provides feedback on one's own level of knowledge and the complexity of the certification.

Scrum Product Owner Training (PSPO I)
Start into the agile world as scrum product owner

Training objectives

- We prepare you with our certified trainers and coaches for the PSPO I exam, which is based on the current Scrum Guide.

- Understand the basic principles of the agile project management methodology Scrum.

- Learn methods and approaches for your work as a product owner.

- Learn - as part of the Scrum team - to maximize customer value.

- Help your teams to reap the benefits of Scrum.

Target audience

- This entry-level training is aimed at anyone who wants to use the benefits of Scrum for their professional activities. In doing so, you will be empowered as a certified product owner to promote cultural agility and deliver customer value early in development and incorporate feedback continuously.

Exam information

- **The exam fee is included in the training price.**

- The one-hour Professional Product Owner exam can be taken online at any time.

- Certification is granted after passing the examination.

Content

- Internalize the mindset that Scrum is based on.

- Learn the importance of cultural agility and how to use it for your team success.

- Understand the important Scrum artefacts, roles, and events.

- Experience the cooperation of the different roles within the Scrum process model in an interactive Scrum simulation.

- Learn how targeted requirements management leads initiatives to success.

- Learn the benefits of a strong product vision.

- Learn the rights and duties of a product owner in Scrum projects.

- An examination simulation under real conditions provides direct feedback on one's own level of knowledge and the complexity of the certification.

ALVISSION

Project Simulation Training

Project management with fun and games

Training objectives

- Get involved in a virtual project with SimulTrain® and train your project management skills. SimulTrain® enables project simulation training that teaches participants core project management skills in a fun way. The participants experience a realistic project in a collaborative learning environment through SimulTrain®.

- The projects are worked on in small groups, which are faced with exciting challenges due to an ever-changing project environment.

- In SimulTrain®, project managers are allowed to make all the mistakes that can happen during the planning and implementation of a project. The aim is to learn from these mistakes.

- Participants play against each other in groups of 4, which brings a lot of dynamics and fun.

Target audience

- Anyone with an interest in project management.

Blended Learning Concept

- By combining the advantages of different didactic learning tools, we optimize time and costs for our participants, ensure high learning quality and sustainable knowledge transfer.

- Education + Entertainment = Edutainment

- Through the gamification approach and the playful competition between the teams, we achieve sustainable learning success with a lot of fun. This is confirmed by the numerous feedback from participants.

Content

The teams are asked to plan and execute a typical medium-sized project. In doing so, it is important to keep costs, schedule, and quality under control. The motivation of the employees in the fictitious company of the game must not be neglected. The simulator evaluates the decisions made by the teams, allowing the learners to immediately see the consequences of their decisions. (Increase in costs, delay in deadlines, decrease in motivation, etc.).

Feedback loops provide constant feedback and allow the participant to reflect and adjust decisions in a safe environment. The ongoing project requires constant prioritization and quick decision-making without jeopardizing a real project or one's career.

SimulTrain® provides several scenarios corresponding to projects from different industries.

Demo version available at: https://simultrain.swiss/ (Please click on „Save and Go")

SimulTrain® is used in more than 51 countries and has already 200,000 project managers trained.

PMI Professional in Business Analysis (PMI-PBA)®

Get certified as a business analysis professional

Training objectives

- Optimal preparation on your way to certification as a Professional in Business Analysis (PMI-PBA®).

- You will learn to assess the entire scope of the exam and can thus optimally prepare for your PMI-PBA® certification through e-learning and self-study.

Target audience

- Anyone who works with project teams and manages requirements or product development.

- Project or program managers who perform business analysis in their function.

Prerequisites

- With university degree: 4,500 hours. project experience in business analysis.

OR

- With high school diploma or intermediate education: 7,500 hours of project experience in business analysis.

AND in both cases

- 35 training hours that you prove with this training program.

Our Premium Study Concept

- Your path to the PMI-PBA® starts with our live online training, in which you will intensively work on sound exam knowledge and theoretical basics.

- Our trainings are characterized by an optimal combination of knowledge transfer and practical applications.

- You will be trained with high quality course content developed by RMC Learning Solutions.

- We also offer an online exam simulator with more than 700 exam questions.

Content

- Can be checked in detail in the official Examination Content Outline

- Further information about the PMI-PBA® Certification

PMI Agile Certified Practitioner (PMI-ACP)®

Get certified as an agile project management professional

Training objectives

The PMI® Agile Certified Practitioner (PMI-ACP®) is the official proof of your knowledge of the application of the various popular agile approaches, methods, and principles. Take your first step into agile project management and learn how to use agile techniques.

The PMI-ACP® certification was developed by agilists for agilists. The PMI-ACP® training covers many agile approaches such as Scrum, Kanban, Lean, Extreme Programming (XP) and Test Driven Development (TDD). You will develop a basic understanding of agile and learn to distinguish between the different approaches. They learn to select the agile methods that will make their projects successful.

Target audience

- For experienced project experts, such as Project Management Professionals (PMP®), the PMI-ACP® training is the optimal introduction to agile project management methods.

Exam information

- The certification exam consists of 120 multiple choice questions for which you have three hours.

Prerequisites

- high school diploma or intermediate education
- 21 contact hours of training in agile practices, which you prove with this training program.
- 12 months general project experience within the last 5 years.
- 8 months agile project experience within the last 3 years

Content

- PMI-ACP® certification certifies expertise in the application of agile practices.
- A PMI-ACP knows other frameworks, approaches, and ideas besides Scrum, as well as their strengths and weaknesses and various possible combinations from agile project management.
- A PMI-ACP is familiar with agile principles such as self-organization and interdisciplinarity.
- A PMI-ACP can react correctly to the described problems by applying appropriate good practices.

Domains and Tasks for PMI Agile Certified Practitioner (PMI-ACP®):

- Domain I: Agile Principles and Mindset
- Domain II: Value-Driven Delivery
- Domain III: Stakeholder Engagement
- Domain IV: Team Performance
- Domain V: Adaptive Planning
- Domain VI: Problem Detection and Resolution
- Domain VII: Continuous Improvement (Product, Process, People)
- Tools and Techniques
- Knowledge and Skills

Detailed information about the exam content outline: Link

Further information about the PMI-ACP® certification

Agile Leadership Foundation (ICAgile)

Introduction to agile leadership for aspiring leaders

Training objectives

- This certification is an industry-recognized credential that demonstrates knowledge of the key aspects of organizational agility and agile leadership. It certifies a firm understanding of the key skills for developing individual agility, collaborative agility and leading change and transformation.

- The main learning objectives include the acquisition of basic knowledge in the following areas:
  - ✓ Organizational agility
  - ✓ Leadership styles
  - ✓ Emotional Intelligence in Relationships
  - ✓ The manager as an actor in the agile transformation

Target audience

- No experience with agile methods is required.

- It is an entry-level certification that provides new and aspiring leaders with the necessary background knowledge in the values and mindset required to survive and succeed in today's fast-paced organizational contexts.

Your benefits

- Official ICAgile training with an ICAgile accredited organization

- ICP-LEA (Leading with Agility) Certification for active participation and attendance - no examination.

Content

- As leaders in times of accelerating disruptive change, it is imperative that we consciously and continuously improve ourselves and the organizations in which we operate. When enough leaders have done this, people-centered organizations that care about all their stakeholders - including the wider society and the environment - will become the norm.

- This course is for both aspiring and experienced leaders and managers working in any area of human endeavor who feel that traditional methods of leadership and management are no longer sufficient to lead our organizations and communities to success. Different and complementary learning experiences and approaches are used, from guided discussions to interactive collaboration, individual reflection, and short lectures. The main objective is to deepen participants' understanding, engagement and fulfilment of the leadership understanding described above.

- We have combined elements and approaches from neuroscience, positive psychology and social sciences with traditional, agile, and lean project and product paradigms. In this way, we provide a comprehensive and impactful learning experience that leaves participants with a strong desire to experiment with the different tools, techniques, mindsets, and problem-solving opportunities they will encounter throughout the course.

Agile Leadership Journey® (Advanced)
Agile leadership for experienced leaders

Training objectives

- Develop leadership understanding, competence and situational flexibility to improve employee engagement, team productivity, customer value and business results in highly complex and rapidly changing environments.

- Identifying and aligning company values and learning how to assess and improve the company culture through appropriate structures, strategies, and actions towards agile ways of working.

Target audience

- Executive management, senior leadership, VPs, directors, managers, program/project managers, team leaders, change management and change agents.

- Prerequisites are either our Agile Leadership Foundations course or at least 3 years of management or leadership experience.

Your benefits

- Official ALJ training with our partner, an Agile Leadership Journey® accredited trainer ("Guide").

- "Aware Leader" certification for active participation and attendance no exam

Content

- The Agile Leadership Journey (ALJ) Awareness Workshop is delivered by certified ALJ leaders in four 3.5-hour micro trainings and is offered virtually in a modular approach. The ALJ Awareness Workshop helps leaders align, focus, and understand their impact on enabling organizational freedom of action to create customer value.

- Workshop participants will learn important contexts, mindsets, behaviors and focus for leaders to work more effectively in highly complex and rapidly changing environments. This ALJ Awareness workshop explores the personal and organizational context of leadership to shape organizational culture and enable flexible ways of working to improve outcomes.

- The ALJ Awareness Workshop uses a blended learning approach and a visual collaboration platform to fully engage participants in the learning process. It also combines real-time engagement with offline learning through videos, reading and questions to be completed before the groups meet for discussion. This allows for deeper engagement and more sustained learning than typical face-to-face workshops.

Green Project Management GPM-b Certification Training

For certified project managers - 2 days

Training objectives

This training is aimed at certified project managers who want to expand their expertise in the field of sustainable project management. It aims to provide professionals with the essential skills and insights to lead projects with a strong focus on environmental sustainability. Key objectives include:

- Gain a comprehensive understanding of the principles and practices of Green Project Management (GPM)
- Learn how to seamlessly integrate sustainability into project planning to ensure alignment with "green" goals and stakeholder expectations.
- Develop the ability to assess and mitigate environmental impacts throughout the project lifecycle, taking into account environmentally friendly practices.
- Master effective communication strategies to engage stakeholders in sustainability initiatives, foster collaboration, and gain support.
- Equip yourself with the knowledge and strategies you need to confidently pass the GPM-b™ certification exam.

Target audience

- Certified project managers who want to expand their project management skills with a focus on sustainability, as well as individuals seeking GPM-b™ certification.

Exam information

- **Your exam fee is already included in the course fees.**
- The following pre-qualifications are recognized:
  - ✓ AACEI CCP
  - ✓ APM RegPM
  - ✓ AIPM certification, CPPM, CPSPM, or RegPM
  - ✓ IPMA certification, Level A, B, C, or D
  - ✓ PRINCE2, MSP, or MoP Practitioner
  - ✓ PMI certification, PMP, or PgMP
- 75 questions to answer in 90 minutes:
- 60 questions about sustainability methods:
- 15 Questions About Delivery Methods
- If the certification is granted, it is valid for five (5) years.

Content

1. **Introduction to GPM:**
- Overview of GPM principles and practices.
- The importance of sustainability in project management.

2. **Sustainable project planning:**
- Strategies for integrating sustainability into project planning.
- Tools and techniques for green project management.

3. **Environmental impact assessment:**
- Methods for assessing and mitigating environmental impacts.
- Sustainable Resource Management Practices.

4. **Stakeholder engagement for sustainability:**
- Communication skills to communicate sustainability goals to stakeholders.
- Building support for green project initiatives.

5. **Preparation for certification:**
- Review of key GPM-b™ concepts.
- Practice exams and case studies.
- Interactive Q&A sessions.

Learn more about GPM-b™ certification on the Green Project Management Institute website.

Green Project Management GPM-b Certification Training

With project management basics - 3 days

Training objectives

Participate in a comprehensive 3-day training program that combines the essence of Green Project Management (GPM) with foundational project management principles. This dual-focus training is designed for professionals seeking a basic understanding of project management with a particular focus on sustainability. The main objectives are:

- Gain a comprehensive understanding of the principles and practices of Green Project Management (GPM)
- Learn how to seamlessly integrate sustainability into project planning to ensure alignment with "green" goals and stakeholder expectations.
- Develop the ability to assess and mitigate environmental impacts throughout the project lifecycle, taking into account environmentally friendly practices.
- Master effective communication strategies to engage stakeholders in sustainability initiatives, foster collaboration, and gain support.
- Equip yourself with the knowledge and strategies you need to confidently pass the GPM-b™ certification exam.

Target audience

- Professionals who seek comprehensive training that includes both basic project management skills and specialized knowledge in the field of sustainable project management.
- Individuals seeking GPM-b™ certification.

Exam information

- **Your exam fee is already included in the course fees.**
- 150 questions to answer in 3 hours:
- 75 questions about sustainability methods
- 75 questions about delivery methods
- If the certification is granted, it is valid for five (5) years.

Content

1. **Introduction to GPM:**
- Overview of GPM principles and practices.
- The importance of sustainability in project management.
2. **Basic Project Management Skills:**
- Key concepts of project management.
- Fundamentals of project planning and implementation.
3. **Sustainable project planning:**
- Strategies for integrating sustainability into project planning.
- Tools and techniques for green project management.
4. **Environmental impact assessment:**
- Methods for assessing and mitigating environmental impacts.
- Sustainable Resource Management Practices.
5. **Stakeholder engagement for sustainability:**
- Communication skills to communicate sustainability goals to stakeholders.
- Building support for green project initiatives.
6. **Preparation for certification:**
- Review of key GPM-b™ concepts.
- Practice exams and case studies.
- Interactive Q&A sessions.

Learn more about GPM-b™ certification on the Green Project Management Institute website.

Certified SAFe® Agilist

In combination with Disciplined Agile

Training objectives

This comprehensive training program aims to equip professionals with the skills and knowledge they need to effectively navigate and implement agile methodologies in complex, large-scale enterprise environments. Participants will gain a deep understanding of the Scaled Agile Framework (SAFe®) and an introduction to Disciplined Agile (DA), which will enable them to lead and support agile transformations. Key objectives include:

- **SAFe® Expertise:** Mastering the principles and practices of the Scaled Agile Framework (SAFe®), understanding how to apply Lean Agile principles at scale, and effectively leading agile teams.
- **Disciplined Agile Competency:** Gain a solid foundation in Disciplined Agile and learn how to tailor agile and lean practices to the unique needs of the business and manage the complexities of business agility.
- **Collaborative Leadership:** Develop leadership skills to foster collaboration, communication, and alignment at all levels of the organization and support a culture of continuous improvement.
- **Exam Preparation:** We prepare you for the Certified SAFe® Agilist (SA) exam, which validates your understanding of SAFe and agile principles®.
- **Disciplined Agile Intro:** You will develop an understanding of how Disciplined Agile can be applied when working with SAFe.

Target audience

- Anyone who wants to improve their agile skills and play a central role in the dissemination of agile practices in their organizations.
- Agile Practitioners: Scrum Masters, Product Owners, Agile Coaches, and team members who want to expand their knowledge of large-scale Agile implementations.
- Managers and Executives: Executives, managers, and senior executives responsible for leading agile transformations and driving organizational change.
- Project Managers: Those who work in project management and want to apply the agile principles to managing projects at scale.
- Individuals pursuing a Certified SAFe® Agilist certification.

Exam information

- The Certified SAFe® Agilist (SA) exam assesses participants' understanding of SAFe® principles and practices.
- It is a multiple-choice exam that measures the ability to apply agile concepts at scale.

Content

1. **Introduction to SAFe®:**
- Overview of SAFe® Principles and Values
- SAFe® Roles and Responsibilities
- Agile Release Trains (ARTs) and Value Streams
2. **SAFe® Implementation:**
- Lean-Agile mindset
- SAFe® Principles and Practices
- Agile and DevOps practices at scale
3. **Collaborative Leadership:**
- Leading Agile Transformations
- Creating an agile culture
- Building high-performing teams
4. **Preparation for certification:**
- Strategies and Techniques for the SAFe® Agilist (SA) Exam
- Practice exams and case studies
- Q&A sessions
5. **Introduction to Disciplined Agile:**
- Basics and Mindset of Disciplined Agile
- Adapting Agile Practices with DA
- Arbeiten nach dem Prinzip „Choose your Way of Working"

Lateral Leadership

Your introduction to modern leadership for project manager and professionals

Training objectives

- The employee knows what lateral leadership means.

- He knows how to deal with the collegial principle, matrix structures as well as forms of cooperation and work structures in flat hierarchies.

- He can delegate clearly defined tasks, gives the employee freedom of action and decision-making within the scope of his area of responsibility, and at the same time conveys the meaning of his activity.

- He can define rules of the game for his team and knows tools such as feedback systems and preventive conflict management.

- He can apply the rules of communication and distribute competences, tasks, and roles in the team in such a way that the goals can be achieved together.

- The course offers a varied mix of methods for individual work, partner work and group work. Through a permanent alternation of theory and practice, self-reflection as well as the exchange of experiences among colleagues is promoted and the transfer into everyday life is supported.

Target audience

- All project and product managers, team leaders, future managers and those interested in learning the basics of successful team leadership as a management tool.

Content

- Individual analysis of the concrete field of tension Development and reflection of one's own problem; evaluation in the entrepreneurial context.

- The 4 leadership principles of lateral leadership Basics and instruments for convincing leadership and project work

- Personality typology and values

- Location analysis in order to recognize and develop better starting points for goal-oriented action for oneself and others.

- Dealing with conflicts

- Servant leadership

- Escalation and de-escalation; support in conflict discussions

- Feedback

- Comparison of self-image and external image

Project Business Management Foundation

Fundamentals of customer project management

About customer projects

Customer projects are profit centers. Studies show that more than 50% of all projects today are carried out by suppliers and service providers for paying customers.

The project managers who lead these projects face completely different challenges than their colleagues in internal projects: they have to inspire the project customers so that they come back with new business, but they also have to ensure the profitability of the project and actively protect their employer's liquidity.

Training objectives

The aim of the training is for the employees to have the basic knowledge that can be implemented immediately for better project business, including:

- Changing the "mindset" of the participants from pure project management to taking responsibility for a professional center
- Knowledge of the typical process, the roles of the parties involved and the specific challenges for all parties involved.
- Development of risk awareness for project business
- Creation of a common language and a common approach in the project business

Target audience

- Project managers in customer projects
- Employees in business development and offer management.
- Employees of PMOs (Project Management Offices) and CoEs (Centers of Excellence) at project suppliers and service providers (Contractors)
- Claim Managers
- Managers of customer project portfolios

Content

In lectures, discussions and group exercises, the participants learn the tasks that occur during a typical customer project and understand their special challenges.

Our experienced and certified trainers enrich the seminar with many practical examples, which show that the project business is a high-risk business, but that there are also solutions to overcome difficulties.

- The seminar follows the typical course of a customer project from the initial contact through business development and project implementation to formal completion.
- Participants will learn about the roles, methodology and terminology of project business.
- In working groups, these methods are trained interactively and digitally using realistic exercises.
- Participants develop a common understanding of the approach, the language and the particular challenges that need to be overcome.
- This practice-oriented basic training is based on the work of the Project Business Foundation.
- Through the direct implementation of the learned knowledge in the exercises, the participants develop a high level of skills and abilities that they can use profitably in their projects or for their line work immediately after the training.
- Participants will receive a certificate with proof of 14 net learning hours for international certifications.
- They can contribute their projects or plans to the training in advance. This gives them the opportunity to work on their real project tasks in the working groups.

If desired, the seminar can be supplemented by subsequent coaching (structured or on-the-job) and the learning content can be deepened.

Project Business Management Advanced

Managing customer projects in an international context

About international customer projects

If you drive abroad, you must have basic traffic rules in that country to protect yourself from unpleasant and expensive surprises when there are different road signs and different rules apply than at home.

The same applies to project managers in customer projects: they need a basic knowledge that enables them to recognize cultural faux pas and legal pitfalls and to safely avoid them.

Training objectives

The aim of the training is to ensure that the employees employed have immediately implementable basic knowledge for better project business in an international context, including:

- Basic understanding of the opportunities and risks of cross-cultural and cross-border work
- Understanding of cultural differences and their impact on project work
- Basic knowledge of working under contract in the main legal systems: civil law, common law, Islamic law, and others
- Basic knowledge of the most important legal systems
- International Contract Types and Their Impact on Project Business
- International terminology for the development and execution of project contracts

Target audience

- Project managers in international customer projects
- Employees in cross-border business development and in international offer management
- Employees of PMOs (Project Management Offices) and CoEs (Centers of Excellence) at internationally active project suppliers and service providers (contractors)
- Claim Managers
- Managers of international customer project portfolios

Content

In lectures, discussions and group exercises, the participants learn the tasks that occur in the course of a typical cross-border customer project and understand their special challenges.

Our experienced and certified trainers enrich the seminar with many practical examples, which show that the project business is a high-risk business, but that there are also solutions to overcome difficulties.

- The seminar provides insights into contract systems and law in different countries.
- It imparts knowledge about cultural differences and what role they have on the implementation of customer projects.
- It provides insights into the cultural, commercial, and legal traps, the ignorance of which can lead projects into problems, often even into crises.
- In working groups, these methods are trained interactively and digitally using realistic exercises.
- Participants develop a common understanding of the approach, the language and the particular challenges that need to be overcome.
- This practice-oriented basic training is based on the work of the Project Business Foundation.
- Through the direct implementation of the learned knowledge in the exercises, the participants develop a high level of skills and abilities that they can use profitably in their projects or for their line work immediately after the training.
- Participants will receive a certificate with proof of 14 net learning hours for international certifications.
- They can contribute their projects or plans to the training in advance. This gives them the opportunity to work on their real project tasks in the working groups.

If desired, the seminar can be supplemented by subsequent coaching (structured or on-the-job) and the learning content can be deepened.

Your learning experience

We conduct our events as open training courses or in-house training courses. Individual learning, as flexible as you are: Choose your personal preferred form of learning from our various learning formats.

Live-online Training

Didactically developed training for the online format with our online experts. In our live online trainings, participants experience interactive and practice-oriented training courses with a classroom feeling. Participants work together in real time on collaboration platforms in digital learning and practice rooms. Learning success, fun and entertainment are the hallmarks of our trainings.

In Person Training

Face-to-face training at one of our training locations or as an in-house event with our experienced trainers. Our trainings are based on innovative learning formats in combination with modern didactic and learning pedagogical concepts. With our experts, we ensure your learning success.

About us

We have been an authorized Premier Training Partner of PMI® since 2020. We are the first training partner in Germany to offer the entire portfolio of official PMI® certification trainings, e.g. Disciplined Agile® and PMP®. With an international team of experts, our company stands for innovative and interactive trainings with fun and sustainable learning success. We inspire our customers with our digital live online training courses as well as with our proven face-to-face training courses.

What our customers say

> *The ALVISSION team has organized a great, interactive and very lively training, which is carried out in online format with a lot of effort. Didactically strong with interactive board and group work as well as many practical stories round off the training. Recommended!*
